CONDITION OF THE MARKETS

Speculative Dealings Yesterday Marked by Weakness at the Opening.

Decided Break in Wheat, Followed by a Rally at the Close-Corn Also Weak and Irregular-Provisions Dull and Lower.

MONEY, STOCKS AND BONDS.

The Market Undergoes a Sudden Change from Dullness to Activity. NEW YORK, April 6.-Money on call was easy, ranging from 212 to 312 per cent., the last loan being made at 3 per cent .. closing offered at 3@312.

Prime mercantile paper, 6@8 per cent. Sterling exchange quiet but firm at \$4.864 for sixty-day bills and \$4.884 for de-

The total sales of stocks to-day were 343.697 shares, including the following: Atchison, 22,015; Lackawanna, 8,582; Louisville & Nashville, 12,988; North American, 6,271; Northern Pacific, 5,165; Northern Pacific preferred, 8,050; Richmond & West Point, 4,530; St. Paul, 40,260; Union Pacific,

25,785; Western Union, 8,595. The stock market underwent a sudden change in its character, and from the dullness and listlessness of the past two weeks there was a jump into activity and deoided strength, which was a most welcome relief to the street after its long stagnstion. As a result of the operations of the day, almost everything traded in shows material improvement over last week's figures. The feeling on the street this morning was pronouncedly upon the bull side. The stimulating influence undoubtedly came from Chicago, and the stocks in which that center is interested took the lead in the early rise, while outstripping everything else in the amount of business recorded. Chicago Gas was the prime favorite, but Burlington and Rock Island were not far behind, and St. Paul, Atchison and Union Pacific followed closely. The only stocks other than these which attained any prominence during the day were Sugar, New England and Cordage. The new movement on the part of the Chicago people may indicate that the time has come, in their opinion, to bull stocks, owing principally to the adjournment of the Western legislatures and the final defeat of the anti-railroad legislation; or it may mean that the speculation in cereals has culminated, and the capital which has been so long locked up in those deals is now free to seek other channels of profit. However this may be, there is no question but that the advance to-day was due to buying for the long account, and the market having resisted so strenuously all the depressing influences of the past two months a following among the local operators will not be hard to accumulate. The financial situation on the other side is not all that could be desired, but it has ceased to have any terrors movement on the part of the Chicago peo-Bank of England has no deterrent. There were only two really weak spots in the market to-day, Illinois Central and Great Northern preferred, but the latter made no recovery, while the former joined the other grangers and recovered handsomely while showing no gain for the day. The Northern Pacifics were also rather sluggish and failed to maintain the level of the opening figures, though their losses were insignificant, except as in contrast with the rest of the market. The general list, after a firm opening, followed the leaders, and show small advances for the day. There was evidence of

TRADING AT CHICAGO.

Speculative Trade Opened Extremely Weak, but Recovered; Closing Higher.

CHICAGO, April 6.-Extreme weakness characterized the opening of the speculative trading; wheat started le lower than it closed on Saturday, corn and oats were almost equally limp, and provisions were also pressed for sale at the same time. Considerable recovery took place, but not until late in the session, after the shorts had had abundant opportunities to cover their sales of Saturday and the early part of the day. There was a repetition in the wheat pit at the start of the scene enacted on Saturday morning. No one asked over \$1.03 for May wheat as against \$1.0358 at the close of the previous session, but buyers were extremely scarce until it could be bought at \$1.0212. The prime moving cause for the break was the very general belief among the local experts that the late bull campaign was abandoned for the present and a reaction from the recent advance was naturally to be looked for. The heaviest of the local operators were of one accord as regards the immediate future of the market, and sold with freedom under the additional encouragement of lower cables and a promising outlook for fall-sown wheat on this continent. The receipts in the Northwest were heavy in comparison with those of last year. The State reports concerning the condition of winter wheat were flattering with the exception of Wisconsin, which said the fields of that State were still covered with snow and ice. Spring wheat seeding was not making any progress, but the bears were inclined to dwell more upon the weather which might be shortly expected than that which at present prethe close, and after May wheat had worked off to \$1.02 and July from around \$1.0112 at the opening to \$1.0014. The closing cables giving another heavy advance in prices at Berlin and Paris made buying more difficult until finally the scare which pervaded the bull ranks was transferred to the other party, and an advance of 11oc was brought about in the course of the last hour's trading. The whole of the recovery did not stick, but May wheat closed at \$1.03\footnote{1}_8. The corn market was very weak at the opening, and trading was extremely irregular Sales all the way from 67c to 66\footnote{1}_{2}c took place at the same time. The weakness continued until wheat turned up, but the recovery in corn at London are one-third less than the total stocks held at the same time in 1890.

At to-day's market English wheats were stronger. Few kinds were obtainable under stronger. corn did not respond to the full advance made by the other cereal. May sold off to 655sc, and recovered to 665sc, which was the price ruling at the close. The weakness in oats apparent Saturday, and the slumpy condition of the market at the opening,

market helped the decline influences. The market was only fairly active. May started at 53½c, with a few trades at 53¾c.

Thence the price weakened to 53½c, fluctuated around 53½æ53¾c, and closed steady at the top price of the day, the strength being due to a decrease in the visible supply. The market for hog products was easier and prices lower, commission-houses appearing to have a good deal for sale on account or country holders, but a fair demand aprung up at the decline, which took place in the course of the day. The receipts of 32,000 hogs, and the lower prices reported from the yards, caused the market reported from the yards, caused the market to open off considerably, and it had no re-action to speak of until the receipt of the cablegram advising favorable action by the German government concerning the embargo on American pork. That created a lively sensation and a quick recovery, which left prices in the end about 1712c lower for pork, .0212c lower for lard, but without change in the price of ribs, of Saturday. The lead-

The Foreign Grain Trade, LONDON, April 6.- The Mark Lane Ex-

press, in its weekly review of the British grain trade, says: English wheat shares were in active demand at an average rise of 1s. The finest kinds are quoted at from 40s to 42s, and farmers are not eager to sell. Foreign wheats are up 1s. California is firm at 43s. The stocks held at the leading ports barely amount to a total of 1,000,000 quarters. The holdings of flour amount to 500,000 quarters. Large consignments of India, California and Australia wheats will hardly meet the prospective demand. The limited arrivals of barley have raised values

stronger. Few kinds were obtainable under 36s. Foreign wheats averaged 2s dearer. There was a good inquiry for California and Australia. India did not share in the frightened the longs who proceeded to un-load. A decline of 12@ 20 in the sample | badly assorted in the new crop. Good prices | Veals, common to choice......

were offered for forward delivery. Barley, oats and corn rose 6d. Beans and peas were is dearer. Flour was is 6d per sack dearer on the fortnight.

A Woman Best Understands a Woman's Ills. The experiments of Lydia E. Pinkham that years ago gave to the world that blessing, the Vegetable Compound, were made through a feeling of sympathy for the afflicted of her sex. She discovered that nearly all the diseases of woman have a common origin, and therefore may have a common cure. As a result, thousands of women in all parts of the civilized world cherish grateful remembrance of Lydia E. Pinkham's Vegetable Compound, and ever bless its discoverer.

"My Work Shall Be Perpetuated." The perpetuation of Mrs. Pinkham's work was guarded by her foresight from the start. Every suffering woman applying to her received personal attention, and the details of every case were recorded. These records are to-day the largest in the world, contain facts not to be found elsewhere, and are now available to the women of the world.

A Savior of Her Sex. When pain becomes a constant companion; when there is no repose for the sufferer by day or night; when life itself seems to be a calamity; and when all this is reversed by a woman, whose only ambition is to do good to others, has she not won the above title? Suffering women who seek Mrs. Pinkham find both a helper and friend.

A Record of a Life's Work.

The entire facts connected with every case ever treated by Lydia E. Pinkham are on record. With the assistance of lady clerks writing at her dictation, over one hundred letters per day have been disposed of, the answers going to ladies in all parts of the world, and the facts compiled in a library of reference for the benefit of suffering women. Here is a life's practice of a woman among women, and represents the largest collection of facts the world has ever known.

LYDIA E. PINKHAM'S Compound Has stood the test of many years, and is to-day the only Positive Cure and Legitimate Remedy for those peculiar weaknesses and ailments of women, all organic diseases of the Uterus or Womb, and Ovarian Troubles, Bearing-Jown
